

DRUG FACTS

Active ingredient(s)

Purpose

Use(s)

temporarily relieves common cold/flu symptoms:

- nasal congestion (DAYTIME ONLY)
- cough due to minor throat and bronchial irritation
- sore throat
- headache
- minor aches and pains
- fever
- relieves runny nose and sneezing (NIGHTTIME ONLY)

Warnings

Liver warning: These products contain acetaminophen. Severe liver damage may occur if you take

- more than 8 softgels in 24 hours (Nighttime) or more than 12 softgels in 24 hours (Daytime), which is the maximum daily amount
- with other drugs containing acetaminophen
- 3 or more alcoholic drinks every day while using these products

Sore throat warning: If sore throat is severe, persists for more than 2 days, is accompanied or followed by fever, headache, rash, nausea, or vomiting, consult a doctor promptly.

Do not use

- with any other drug containing acetaminophen (prescription or nonprescription). If you are not sure whether a drug contains acetaminophen, ask a doctor or pharmacist.
- if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.
- to make a child sleepy

Ask a doctor before use if you have

- heart disease (DAYTIME ONLY)
- thyroid disease (DAYTIME ONLY)
- diabetes (DAYTIME ONLY)
- high blood pressure (DAYTIME ONLY)
- cough that occurs with too much phlegm (mucus)
- liver disease
- persistent or chronic cough as occurs with smoking, asthma or emphysema
- trouble urinating due to an enlarged prostate gland
- glaucoma (NIGHTTIME ONLY)
- a breathing problem such as emphysema or chronic bronchitis (NIGHTTIME ONLY)

Ask a doctor or pharmacist before use if you are

- taking sedatives or tranquilizers
- taking the blood thinning drug warfarin

When using this product

- do not use more than directed

In addition, when using NIGHTTIME:

- excitability may occur, especially in children
- marked drowsiness may occur
- avoid alcoholic drinks
- be careful when driving a motor vehicle or operating machinery
- alcohol, sedatives and tranquilizers may increase drowsiness

Stop use and ask a doctor if

- you get nervous, dizzy or sleepless (DAYTIME ONLY)
- redness or swelling is present
- fever gets worse or lasts more than 3 days
- new symptoms occur
- pain, nasal congestion or cough gets worse or lasts more than 7 days
- cough comes back or occurs with rash or headache that lasts.

These could be signs of a serious condition.

If pregnant or breast-feeding

Keep out of reach of children

In case of overdose, get medical help or contact a Poison Control Center right away. (1-800-222-1222) Quick medical attention is critical for adults as well as for children even if you do not notice any signs or symptoms.
